

# Put Me In, Coach

## Customization Levels

### Level 1: Insert Company Branding

We will work with your core team to modify the color scheme, logo and cover of the participant's manual to better represent your organization's brand.

*Branding of additional participant materials (e.g., stress ball, game day ticket, lanyard) and/or facilitator materials (e.g., poster, facilitator kit) may result in a change of level.*

### Level 2: Edit Existing Course Content

We will work with your core team to modify existing content upon request. This includes dropping in company-specific language (text) or imagery.

*More significant text edits (e.g., re-writes) may result in a change of level.*

### Level 3: Create New Content

We will work with your core team to create new activities, exercises and content upon request.

### Level 4: Comprehensive (Multi-Faceted) Customization

A comprehensive customization means making changes to multiple areas highlighted above. We will strategize with your core team to ensure the process is well defined and will create a project plan that meets your needs and expectations for best implementation.

Participant Kit Contents	Facilitator Kit Contents
